	Bordeaux (deep purple)			
	Bubble Gum (pink)			
	Mini Silver (white w/purple)			

1 quart native perennial @ \$8.00 each		Quantity:	Cost:
Black-Eyed Susan 	Rudbeckia hirta A very easy to grow native of moist to dry soils is the Black-eyed Susan. It is a short-lived perennial, but persists through self-seeding for many years, creating a large mass of colorful and cheerful blossoms. Growing 1-3 feet in full to part sun, this showy, long-blooming plant is a must for a carefree garden. Its bright yellow petals with black centered flowers attract butterflies from June through September.		
Great Blue Lobelia 	Lobelia siphilitica The Great Blue Lobelia is a striking plant in full to part sun. It grows in low, moist ground flowering July through October. Its beautiful 1-4 foot spike of many blue flowers may become aggressive in a garden, but, who wouldn't want it to be?		

<p>Wild Bergamot</p> 	<p>Monarda fistulosa A very popular native for the garden, this lovely plant grows 2-4 feet, blooming June through September. Many dense, lavender clusters of flowers attract hummingbirds, birds, butterflies and moths. Wild Bergamot grows in a wide range of soils: moist to dry, sand to clay, in full sun to part shade.</p>		
<p>Cardinal Flower</p> 	<p>Lobelia cardinalis If you want RED, this is the flower for you! This very attractive native of wet to moist soil grows to a height of 2-5 feet. Blooming in July-September, Cardinal Flower attracts hummingbirds. It grows in full sun to nearly full shade in moist, rich soils. As it is self-sowing, allow the seed to drop naturally for a mass of scarlet in the fall.</p>		
<p>Purple Coneflower</p> 	<p>Echinacea purpurea Popular and pretty, these bold Purple Coneflowers are easy to grow in any sunny to partly sunny location. In moist to dry soil, purple coneflower grows 3-4 feet, blooming in late summer. The many seeds self-sow and provide birdfeed in the winter months.</p>		
<p>Prairie Blazing Star</p> 	<p>Liatris pycnostachya One of the tallest and showiest of the blazing stars, this one attracts many butterflies. In full sun to part shade with moist soil it can reach about 5 feet, with dense pink-purple spiked blossoms. It blooms July through September leaving seed for the wintering birds</p>		
<p>Butterfly Weed</p> 	<p>Asclepias tuberosa This popular milkweed requires full to part sun. Its bright orange blossoms attract bees, hummingbirds, monarch and orange sulphur butterflies. This stunning plant blooms June through August in well drained, dry to moist soils and reaches a height of 2-3 feet.</p>
